Our summary

S. Department of Energy awarded to the state. The money is meant to support building energy assessments, energy audits and building upgrades across North Carolina. The office has chosen energy efficiency as the main focus, with priority on building upgrades, especially projects that carry out upgrades identified through audits already completed or to be completed after award. Eligible upgrade types include comprehensive multi-system improvements, electrification that supports grid interaction, onsite renewables with battery storage, retro-commissioning, and a mix of high and low return measures. 4 million dollars available overall. Projects must finish by June 30, 2027, and awards are likely in early 2027. Applicants should be aware that work going beyond the core energy efficiency activity may trigger federal environmental and historic preservation reviews. Responses are submitted by responding to the full solicitation document and questions and answers are posted separately, with the office contact at the listed email address.

Federal award history doesn't apply to this issuer

Federal award history covers federal contracts only. For state, local, education, private and non-profit RFPs, market context comes from the RFPs RFP Detector has seen: how active this issuer is, how many similar RFPs appear in the same state, and the typical published value once enough of them state one. With no history yet, these factors are scored as neutral.
