Our summary

The Illinois Department of Transportation is seeking sealed bids for an electronic screening system upgrade at the Bolingbrook Northbound Weigh Station. The work covers supplying and installing commercial vehicle screening equipment, including tire anomaly detection, an overview camera, license plate recognition, USDOT number and hazardous materials placard recognition, in-road loop sensors, automatic thermal inspection, and upgraded weigh-in-motion electronics. Lane control signals, communications and power wiring, and conduit are also included, with existing equipment reused where specified. All work must follow the department's Bolingbrook E-Screening System Upgrade specifications. Bidders must submit a signed offer, a signed contract, and the required vendor disclosure forms through the state's bidding system, since omitting the disclosure forms leads to disqualification. The purchase is an open-market invitation for bid and is not a small business set-aside. No Business Enterprise Program goal applies. Questions and clarifications should go to the listed purchaser.
