Our summary

The Center for Land Surface Hazards is inviting proposals for its seed-level Small Grants Program covering the 2026-2027 cycle. The funding supports inventive projects that move forward understanding of cascading land surface hazards, widen participation from communities, and link observation, modeling and societal relevance. Four priority themes are named: cross-observatory inquiry and modeling of geohazard cascades, linking cascades through modeling, remote sensing and artificial intelligence products for process understanding at scale, and event-driven studies of emerging hazard types. Proposals outside these themes are also welcome if they advance hazard cascade science or add community engagement and workforce development work. Applicants should note the proposal deadline, expected award notices in spring 2027, a project period running from May 2027 to April 2028, and a final report due at the end of May 2028. Full guidance and the application route are on the program website, and questions go to the listed contact address.

02 Score breakdown

Every RFP starts at 50. Each factor adds or subtracts points depending on how this RFP compares with a typical one, scaled by its weight and by how sure we are of the data. Unknown data has no effect.

Factor		◀ lowers the score · raises the score ▶	Points	Range
Value	UNKNOWN		0.0	−18.0 / +18.0 w 20 · conf 0%
No value published, and there isn't enough award history to estimate one. Scored as neutral.

Federal award history doesn't apply to this issuer

Federal award history covers federal contracts only. For state, local, education, private and non-profit RFPs, market context comes from the RFPs RFP Detector has seen: how active this issuer is, how many similar RFPs appear in the same state, and the typical published value once enough of them state one. With no history yet, these factors are scored as neutral.
