Our summary

Cascade Water Alliance is seeking a single firm to provide on-call construction management support for capital improvement work. The work covers the White River and Lake Tapps Reservoir project along with other infrastructure the alliance owns or may acquire later. The planned arrangement is a three-year contract with an option to extend for two further one-year periods. Firms wishing to be considered must submit their proposals by the stated deadline, following the instructions contained within the full RFP document, which is linked from the announcement. The page itself gives limited detail on evaluation criteria, staffing expectations or pricing format, so interested firms should consult the linked document for those requirements before preparing a response. Proposals are to be delivered to the alliance according to the method set out in the RFP. Because the notice is brief, reviewers should treat the linked materials as the authoritative source for scope, qualifications and submission details,...
